

4D3N DIVING MABUL

Highlights:

- Mabul Island offers some of the best macro diving around. Crazy creatures and tiny, interesting-looking critters are what the diving is all about at Mabul Island. Divers enjoy regular sightings of flashing flamboyant cuttlefish, pygmy seahorses, harlequin shrimp, well-hidden frogfish, blue-ringed octopus, scorpion leaf fish and more.
- Some of the world's weirdest and most wonderful critters can be found around Kapalai, which is why it's known as one of the world's best muck diving destinations. Diving depths at Kapalai range from 5 to 18 metres, you'll find a sandy sea floor with some blocks of coral growth and a few sloping reefs. The visibility in the area is between 5 and 15 metres which is perfectly suited for muck diving.
